THE TECHNOLOGICAL INNOVATION OF LIPOLASER NEO RF

The Lipolaser NEO RF combines **three advanced technologies** to sculpt your figure and enhance the appearance of your skin :

➜Lipo-Diodes use low-intensity laser technology to trigger targeted fat release, reducing localized fat deposits.

➜Radiofrequency (RF) generates deep heat that releases fat and stimulates collagen production, tightening the skin.

➜**Electromuscular Stimulation (EMS)** sends electrical impulses that contract the muscles, improving circulation and toning tissues.

This comprehensive approach helps reduce cellulite, tone the body, and restore skin firmness and radiance.
